DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Norman N. Kunitz, Reg. # 20,286 on 9/25/08.

The application has been amended as follows:

Please replace claim with the following:

1. A method of reading messages which are sent over a data bus in a motor vehicle between electronic units, comprising:
 - providing at least one communications network based on at least one data bus to which several electronic units are connected by means of a bus interface,
 - ~~at least one data interface for~~ connecting the communications network with an external data processing unit by at least one data interface,

Art Unit: 2113

- ~~at least one cyclically overwritable, volatile storing means~~ for the storing of messages which were sent in the communications network in at least one cyclically overwritable, volatile storing means,

- ~~examining at least one monitoring unit having an executable program which examines~~ the messages stored in the volatile storing means for selected, parameterizable attributes with at least one monitoring unit having an executable program,

- upon the occurrence of at least one definable trigger event, whose occurrence is monitored by the executable program, ~~and upon whose occurrence~~ stopping the cyclical overwriting of the volatile storing means ~~is stopped~~ for at least as long until the data content of the volatile storing means is transferred to a second, non-volatile storing means.

Please replace claim 4 with the following:

4. The method as defined in claim 1, ~~wherein~~ including reading the data content of the non-volatile storing means is, upon request by an external electronic data processing device, ~~read~~ thereinto the external electronic data processing device over the data interface of the communications network.

Please replace claim 5 with the following:

5. The method as defined in claim 1, ~~wherein~~ including forming the trigger event ~~is formed~~ from a logic or time-related concatenation of the parameterizable attributes.

Art Unit: 2113

Please replace claim 9 with the following:

9. The method as defined in claim 1, ~~wherein~~ including defining and monitoring several trigger events ~~are defined and monitored~~.

Please replace claim 10 with the following:

10. The method as defined in claim 1, ~~wherein~~ including after occurrence of a trigger event, effecting a notification to an external data processing device concerning the occurrence of the event ~~is effected~~.

Please replace claim 11 with the following:

11. The method as defined in claim 10, ~~wherein~~ including reading the data content of the non-volatile storing means is, after sending the notification, read into an external electronic data processing device at the request thereof.

2. The following is an examiner's statement of reasons for allowance: When read as a whole, claim 1 is allowable with respect to the following:

Art Unit: 2113

3. The primary reason for allowance is the combination of the limitations of A method of reading messages which are sent over a data bus in a motor vehicle between electronic units, comprising upon the occurrence of at least one definable trigger event, whose occurrence is monitored by the executable program, stopping the cyclical overwriting of the volatile storing means for at least as long until the data content of the volatile storing means is transferred to a second, non-volatile storing means.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

4. Applicant's arguments, see Remarks, filed 6/17/08, with respect to claim 1 have been fully considered and are persuasive. The rejection of claim 1 has been withdrawn.
